

INSTALLATION MANUAL FOR ROLE WIDGET

1. Install Drupal with profile: ROLE Widget Store +
2. Go to [Site building -> Modules -> List](#) and activate every module under the category [Features](#). And save Configuration (Some modules must be enabled: Just click continue).
3. Go to [Content management -> Content types](#) and click on [Edit: Web Tool](#). Scroll down and you see the category [MULTISTEP FORM](#): Click on it and set Enabled multistep for this form on Enabled. Save Content Type afterwards.
4. Go to [Site building -> Blocks](#) and set the configurations just like in the picture below: Save the blocks afterwards

Region	Block Name	Configuration	Action
sidebar first	Apache Solr Core: Sorting	sidebar first	configure
	Apache Solr Search: Current search	sidebar first	configure
	Apache Solr Search: Filter by taxonomy Tool Categories	sidebar first	configure
	Apache Solr Search: Filter by taxonomy Functionalities	sidebar first	configure
	Apache Solr Search: Filter by content type	sidebar first	configure
	Apache Solr Search: Filter by taxonomy Learning Domains	sidebar first	configure
sidebar last	No blocks in this region		
header top	No blocks in this region		
header	No blocks in this region		
preface top	Catalogues	preface top	configure
	Search form	preface top	configure
preface bottom	No blocks in this region		
content top	Multistep Menu - OpenSocial	content top	configure
	Multistep Menu - Bundle	content top	configure
	Multistep Menu - W3C	content top	configure
	Multistep Menu - Web Tool	content top	configure
content	No blocks in this region		
content bottom	No blocks in this region		
postscript top	No blocks in this region		
postscript bottom	No blocks in this region		
footer	No blocks in this region		
node top	No blocks in this region		
node bottom	No blocks in this region		
Above comments	Apache Solr recommendations: More like this	Above comments	configuredelete

5. Go to [Site configuration -> Custom Search -> Settings](#). Set the configurations just like in the picture below and save it. (Don't forget the checkbox: Display label)

SEARCH BOX
☐ Display label
Search box label:

Enter the label text for the search box. The default value is "Search this site".
Search box default text:

This will change the default text inside the search form. Leave blank for no text. This field is blank by default.
Search box size:

The default value is "15".
Search box maximum length: *

The default value is "128".

SUBMIT BUTTON
Submit button text:

Enter the text for the submit button. Leave blank to hide it. The default value is "Search".
Submit image path:

The path to the file you would like to use as submit button instead of the default text button.
Submit image:
 Keine Datei ausgewählt.
If you don't have direct file access to the server, use this field to upload your image.

6. Go to [Site building -> Blocks](#). On [Search form](#) click on configure (Maybe you need to zoom further away to see the configure option. Therefore press Strg + Scroll down with your mouse). At the category [BLOCK SPECIFIC SETTINGS](#): Type in the Block title: <none> and Save block.

7. Now we need to create some views for our Showcases and Profiles: Go to [Site building -> Views -> Import](#) and paste the code from showcase_bundles.txt. Click Save Import. (Just import the code! You don't have to give the View a name or something like that and DON'T forget to SAVE the View). Do this step again with showcase_tools.txt ; showcase_user_reports.txt ; profile_bundle_list.txt ; profile_user_report_list.txt . You can find these files in the Step 7 folder.
8. Go to [Site building -> Views](#) and disable the Default Node view: bundles (bundles).
9. Go to [Site building -> Pages -> Import Page](#) and paste the code from Step 9/showcases_page.txt in. Click import and save the page:

10. Go to [Site building -> Menus](#). Click on [Catalogues](#) and add these two menu items:

Path: tools

Menu link title: Tools

Weight: -50

Path: widget-contest

Menu link title: Contest

Weight: -48

11. Go to [Content management -> Node Export: Import](#) and paste in the code from Step 11/partner_page.txt and click on import

12. Go to [Site building -> Menus](#). Click on [Secondary Links](#) and add these three menu items:

Path: user

Menu link title: My Store

Weight: -43

Path: node/32

Menu link title: Partner

Weight: -47

Don't forget to SAVE the menu items!

Path: user/register

Menu link title: Register

Weight: -45

Images

If you want to upload images like background image or slideshow-image, you have to do it yourself. For the Slideshow: Go to [Content -> Create Content -> Frontpage Slider Content](#). Type in a Title, a Description and upload a Slider Image, just like in the picture below:

Slider Image: *

Keine Datei ausgewählt.

Maximum file size: 2 MB
Allowed extensions: *png gif jpg jpeg*
Images must be larger than 940x360 pixels

You can do the same for many Contents, not only the Frontpage Slider, just try it out.

For changing the Theme settings, you have to go to [Site building -> Themes -> Configure -> Role Widget Store Theme 2](#). There you can find configuration for logos, icons, background images, etc. .

ApacheSolr

If you want to use the search function, you have to start ApacheSolr. Go to [your workspace/role/applications/apacheSolr](#) and click on start.jar . Now you can use the search function completely on your local server.

Now you have finished the Installation for the Role-Widge-Store Website!
